

The majority of amendments substitute reference to a figure including reference to panel letters rather than by reference to figure numbers alone.

The description of Figure 14B was amended to correct the reference to the magnification power from 3100x to 3700x as indicated on the informal drawing.

In addition, reference to "Fig 3, top panels" at page 55 was amended to refer to the bottom panels (with reference to panel letters) as labelled in the figure.

References to Figure 8, in the examples (page 69) were corrected to refer to Figs. 7A-F which corresponds to the description in the "FIGURE LEGENDS". Also, reference in the example to the "left", "middle" and "right" panels is consistent with Figs. 7A-F.

Reference to Figure 8A-8E, which illustrates data from aggregates as stated in the FIGURE LEGENDS was also inserted into the text at page 69 describing these results.

Similarly, reference to Fig. 10, in the example at page 70 which describes the time course for development of Ia antigens was amended to refer to Fig. 9 which is also properly described in the FIGURE LEGENDS.

Reference to Fig. 10 which illustrates pulse/chase data and which is described in the FIGURE LEGENDS was inserted in the corresponding portion of the example at page 71.

Reference to Figure 12 at page 81 was corrected to refer to figure 17 which is consistent with the rest of the description of that figure at that portion of the specification.

Applicants also submit herewith formal drawings for Figures 1-23 and 22-24 in response to the Notice of Draftperson's Patent Drawing Review dated November 24, 1994.

Applicants have corrected margins, labeling and clarity of the figures as requested. Regarding Figure 21, applicants believe that the best version of this figure was filed with the original application and request that the original figure be used as the formal drawing. Figure 22 is a photocopy of a color photomicrograph from the publication describing this work in the present application. (Romani et al *J. Exp. Med.*, 180:83-93 (1994) copy enclosed.)

None of these amendments constitutes new matter and applicants respectfully requests their entry into the application.

The Commissioner is hereby authorized to charge any additional fees which may be required, or credit any overpayment, to Deposit Account 13-4500, Order No. 2016-4000US3. A DUPLICATE COPY OF THIS SHEET IS ATTACHED.

Respectfully submitted,

MORGAN & FINNEGAN, L.L.P.
